

Snow Day Christmas Ornament

Assembly Instructions:

1. Print out on thicker paper, such as 100 lb card stock. Use two-sided print option, if available.
2. Cut out the 6 pieces along the dotted black lines. If your printer does not have the two-sided print feature, cut out the 12 pieces and glue the opposite sides together to form 6 pieces.
3. Slide the pieces together and strengthen the joints with tape.

Tip 1: The four half circles should line up together to form complete red and yellow circles.
 Tip 2: Attach a string to the top of the ornament to hang on your Christmas tree!
